GST-Input and Output Tax Credit

What is ITC?

Input credit means at the time of paying tax on output you can reduce the tax you have already paid on inputs and pay the balance amount.

Here's How

When you buy a product/service from a registered dealer you pay taxes on the purchase. On selling you collect the tax. You adjust the taxes paid at the time of purchase with the amount of output tax (tax on sales) and balance liability of tax (tax on sales minus tax on purchase) has to be paid to the government. This mechanism is called utilization of ITC.

Example

You are a manufacture

- › Tax payable on output (Final Product) is Rs 450
- › Tax paid on input (Purchases) is Rs 300
- › You can claim INPUT CREDIT of Rs 300 and you only need to deposit Rs 150 in taxes

The GST regime promises seamless credit on goods and services across the entire supply chain with some exceptions. ITC is considered to be the lifeline of the GST regime. In fact it is the provisions of ITC which essentially make GST a value added tax i.e. collection of tax at all points of supply chain after allowing credit of tax paid at earlier points.

Who can claim ITC ? Sec 16

ITC can be claimed by a person registered under GST only if he fulfils ALL the conditions as prescribed

- › The dealer should be in possession of tax invoice
- › The said goods/services have been received

Example

'A' is a trader who places an order on 'B' for a consignment of soda ash. 'A' receives a buying order from 'C' for the same quantity of soda ash. 'A' instructs 'B' to deliver the goods to 'C' and in turn he raises an invoice on 'C'. Though the goods are not physically received at the premises of 'A' section 16(2)(b) allows ITC of such goods to 'A'

- › Returns have been filed
- › The tax charged has been paid to the government by the supplier
- › When goods are received in instalments ITC can be claimed only when the last lot is received

Example
 XYZ enters into a contract with ABC for supply of 10 MT of a chemical for Rs 1,18,000 (inclusive of GST of Rs 18,000) in the month of August. The chemical is to be delivered in lots over a period of three months. ABC raises the invoice for the entire amount in August and XYZ also makes the payment in the same month but the supply is completed in November. Though XYZ paid the full tax as early as August, it can take the ITC of the same only on receipt of last instalment of the chemical in the month of November

- › No ITC will be allowed if depreciation has been claimed on tax component

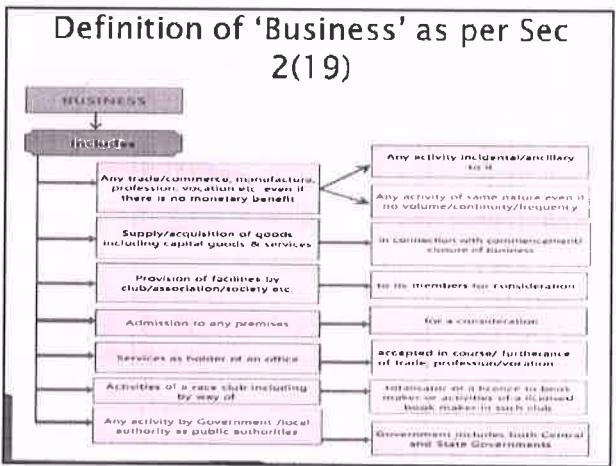

Explanation
 If the person taking ITC on capital goods and plant and machinery has claimed depreciation on the tax component of the cost of the said items under the Income-Tax Act 1961, the ITC on the said tax component shall not be allowed. Thus, in respect of the tax paid on such items, dual benefit cannot be claimed under Income-Tax Act 1961 and GST laws simultaneously. In other words either depreciation on the tax component can be claimed under Income-Tax Act or ITC of such tax paid can be availed under GST laws

- › Payment for the invoice to be made within 180 days

What can be claimed as ITC ?

ITC can be claimed only for BUSINESS PURPOSES. ITC will not be available for goods or services exclusively used for

- › Personal Use
- › Exempt Supplies
- › Supplies for which ITC is specifically not available

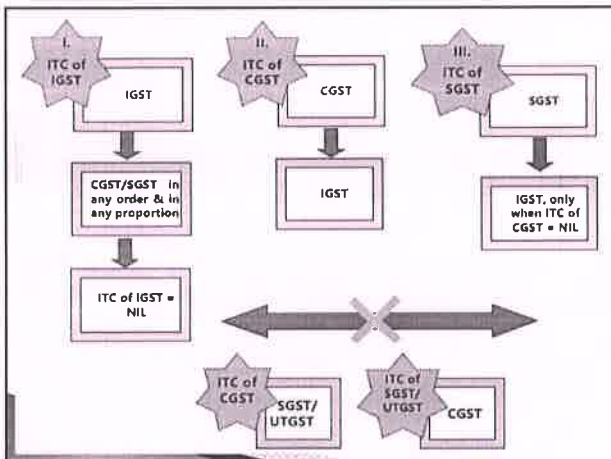

Apportionment of ITC Sec 17

The fundamental principle of credit scheme under value added tax is that tax paid on inputs, input services and capital goods can be availed as credit only when the output is taxable. Thus, when tax is not payable on output, credit cannot be availed.

How ITC is utilized Sec 49

The person may use the ITC to pay his output tax liability. As we know that Indian GST is a dual GST wherein two taxes viz. CGST and SGST/UTGST are levied concurrently on a supply transaction. While the CGST revenue accrues to Central Government, SGST and UTGST revenue accrue to respective State Government and Union Territory respectively. Hence, ITC of CGST and SGST/UTGST is not inter-changeable and thus, cross utilization of CGST and SGST/UTGST is not permissible. IGST is a transitory tax. IGST paid by taxpayer initially goes to the Central Clearing Authority. ITC of IGST can be utilized for payment of CGST or SGST/UTGST (or vice versa). Thus, cross utilization of IGST and CGST, SGST/UTGST is permissible. Flexibility has been provided to the taxpayer to utilize ITC of IGST for payment of CGST and/or SGST/UTGST in any proportion and in any order subject to the condition that the entire input tax credit on account of integrated tax is completely exhausted before the input tax credit on account of Central tax or State/Union territory tax can be utilized. If ITC of IGST is used for payment of SGST/UTGST (or vice versa), corresponding debit/credit is made to respective State Government/Union Territory.

Numerical

To Study and Understand the Concepts of IGST, CGST and SGST under GOODS AND SERVICE TAX (GST)

C.A. ,DR.,PROF. ASHOK UTTAM MOJAD

Important Concepts of GST

- **GST:-** Goods And Services Tax (GST) is an indirect tax levied on the supply of goods and services. This law has replaced many indirect tax laws that previously existed in India. GST is one indirect tax for the entire country.
- **CAPITAL GOODS:-** capital goods means goods, the value of which is capitalized in the books of account of the person claiming the input tax credit and which are used or intended to be used in the course or furtherance of business Example:- Plant and machinery capitalized in the books of accounts could be considered as capital goods for claiming credit of tax paid.

- **INPUT GOODS:-** Input goods means any other than capital goods used or intended to be used by supplier in the course or furtherance of business.
- **INPUT SERVICE:-** Input service means any service used or intended to be used by a supplier in the course or furtherance of business.
- **PERSON:-** Sec 2(72) of CGST Act basic concepts of GST "person" includes- An Individual, A Hindu Undivided Family, A Company, A Firm, A Limited Liability Partnership, An Associations of persons or a body of individuals, whether incorporated or not, in India or outside India, Any Corporation established by or under any Central Act, State Act or Provisional Act or a Government company as defined in clause (45) of section 2 of The Companies Act, 2013, Anybody corporate incorporate by or under the laws of a country outside India, A co-operative society registered under any law relating to co-operative societies, A local Authority, Central Government or a State Government, Society as defined under the Societies Registration Act, 1860, Trust, Every artificial juridical person, not falling within any of the above.

- **OUTPUT TAX:-** In short output GST is the tax collected on sales. Sec 2(60) of CGST Act basic concepts of GST 38 "output tax" in relation to a taxable person, means the tax chargeable under this act on taxable supply of goods and services or both made by him or by his agent but excludes tax payable by him on reverse charge basis Output tax is GST charged and collected on sales/supplies of goods and services.
- **INPUT TAX:-** In short input GST is the tax on purchase. Sec 2(62) of CGST Act basic concepts of GST 43 "input tax" in relation to a registered person, means the central tax, state tax, integrated tax or Union territory tax charged on any supply of goods or services or both made to him and includes- The integrated goods and services tax charged on import of goods, The tax payable under the provisions of sub-section and of section 5 of the Integrated Goods and Services Tax Act, The tax payable under the provisions of sub-section and sub-section of section 9 of the respective State Goods and Services Tax Act, or the tax payable under the provisions of sub-section and sub-section of section 7 of the Union territory goods and Services Tax Act, but does not include the tax paid under the composition levy.

State Goods and Service Tax [SGST]

- The supplies under SGST do not include alcohol for human consumption. Furthermore, this levied tax comes under the State Goods and Services Tax (SGST) Act, 2017 and is governed by the same. This kind of tax is levied on the transaction value of the goods or services supplied as per section 15 of the SGST Act.

Features

- SGST is levied and collected by the states on all goods and services supplied for consideration.
- The tax collected is deposited to the accounts of the respective state
- Each state has its separate SGST act under its State Goods and Service Tax Department. However, the basic features of the GST law for all the states like the charges, valuation, taxable event, measure, classification, etc. would remain the same across the respective act of each state
- SGST is not applicable to the exempted goods and services as they do not come under the influence of GST. Furthermore, SGST is also not applicable where the aggregate annual turnover is less than the prescribed limit.

Example of CGST and SGST

- Let's suppose Ajay is a dealer in Udaipur who sold goods to Mayur in Bangalore worth Rs. 20,000. The GST rate is 18% inclusive of the CGST rate of 9% and SGST rate of 9%. In such a case, the dealer collects Rs. 3600 of which Rs. 1800 will go to the Central Government and Rs. 1800 will be deposited to the Rajasthan Government.

Integrated Goods And Services [IGST]

- IGST is a tax levied on all Inter-State supplies of goods and/or services and will be governed by the IGST Act. IGST will be applicable on any supply of goods and/or services in both cases of import into India and export from India.
- Integrated Goods and Service Tax or IGST numerically equals= CGST+SGST. Movement of goods from New Delhi to Agra will attract IGST.

Rates

- 5%
- The most commonly used products that are subjected to a 5% GST rate are cream and yogurt, paneer, cashew nut, raisins, fruit and nuts and a few others. Now for these products, 2.5% goes to the state government and the rest 2.5% goes to the central government. Many household items are covered in this section.

- Maharashtra has been topping the list of highest GST collections by a state for long, followed by Karnataka.
- In almost all cases, the total tax liability is divided into two equal values and distributed equally between state and central government.
- These rates are decided by the GST Council. The GST Council meets for a couple of times in a year as and when required however there is no regular fashion.

- 18%

- Examples of products being taxed at 18% are bindis, chocolates, fountain pens, tripods, soap, toothpaste and industrial intermediate products are therein this slab. Here 9% goes towards SGST and 9% goes towards CGST. The central goods and services tax act 2017 has a full list of items.

- 12%

- 6% GST rate is the second slab of rates under GST. Citrus fruits, jams, sausages, drinking water, pots and jars, geometry box, cutlery, railway coaches, printer ink, wooden toys and more. Here for every product, 6% goes towards CGST and 6% goes towards SGST. This section covers processed food to a great extent.

Registered place of business

- If services are provided from a registered place of business, that registered place of business becomes the 'location of supplier of services'. If a supply of services is made from a place which is not a registered place of business, a further enquiry has to be undertaken as to whether the said place is a fixed establishment or not.

Fixed establishment

- The definition of 'fixed establishment' in Section 2(50) of the CGST Act confines that concept to the realm of services. A 'fixed establishment' is a place (other than a registered place of business) which has the following characteristics:
 - Sufficient degree of permanence to supply or to receive and use services for its own needs.
 - Suitable structure in terms of human and technical resources to supply or to receive and use services for its own needs.

- If a supply of services is made from a place which is not a registered place of business, then the very nature of the supply may change if that place also does not qualify as a fixed establishment. This is because, the rules for determining inter-state and intra-state supplies are not similar for an unregistered place which is a fixed establishment and an unregistered place which is not a fixed establishment.

- If a supply of services originates from an unregistered place which is a fixed establishment, then that fixed establishment becomes the location of supplier. However, if a supply of services originates from an unregistered place which is not a fixed establishment, the location of supplier shifts from the place of origin to the usual place of residence, which is an arbitrary location fixed by the statute. When that happens, it is possible that a supply which has originated and has been consumed within the same State may become an inter-state supply only because the usual place of residence is located outside the State.

Usual place of residence

- Where a supply of services originates from a place which is neither a registered place of business, nor a fixed establishment, the place of origination of the supply must be completely ignored. In such cases, the usual place of residence is taken as the location of supplier of services.
- Section 2(113) of the IGST Act contains the definition of 'usual place of residence'. The place where an individual ordinarily resides in his usual place of residence. This will include rented accommodation, as long as it is not a transient accommodation and has indications of residence. On the other hand, for non-individuals, the place of incorporation or the place of legal constitution is the usual place of residence. For a company, the usual place of residence will be the place where the company was incorporated. For persons who are not incorporated, the place of constitution will have to be determined on the basis of the facts of each case.

TYPES OF GST

- There are two types of GST:-

Intra-state

Central Goods and Service Tax

(CGST)

State Goods and Service Tax

(SGST)

Inter-state

Integrated Goods and Service Tax

(IGST)

Principles

- Sections 7 and 8 of the IGST Act deal with the criteria for determining whether a supply is Inter-state or Intra-state in nature. According to Section 7 of the IGST Act, if the location of supplier and the place of supply are in **two different States** or two different Union territories or one State and one Union territory, **then the supply is an inter-state supply**. Where the location of supplier and the place of supply are in **the same State** or in the same Union territory, the supply is an **intra-state** supply as per Section 8.

Location of supplier in Maharashtra

Maharashtra

↓
Intra-State

Place of supply in

Gujarat

↓
Inter-State

- The real principle which arises from the manner in which 'location of supplier of services' and the place of supply of services are defined, is that if a supply of services originates and is consumed in the same State or Union territory, it is an intra-state supply. On the other hand, if a supply of services originates and is consumed in different States or Union territories, it is an inter-state supply. The statutory concept of place of supply of services is founded on the destination-based consumption tax principle and 'location of supplier of services' is the place of origination of the services.

 - Service Tax for Services

Basic Concepts (terminology) in GST

CGST	Central Goods and Services Tax
SGST (*UTGST)	*State Goods and Services Tax (*Union Territory)
IGST	Integrated Goods and Services Tax
RP	Registered Person (Registered Dealer)
URP	Unregistered Person
B2B	Business to Business

Inward Supply	Supply received by organisation (eg. Purchases)
Intrastate	Within the state
Interstate	From one State to another State
Supplier	Seller of Goods or Services

<ul style="list-style-type: none">• 'Goods' used -• For manufacture/production of goods• For rendering of services• For trading• For Business operations	<ul style="list-style-type: none">• 'Services' used• For rendering services in business operations• [eg. Output Tax and Input Tax

Tax payable on Sales (outward supply)

Tax Paid on Purchase of :
Goods (Inputs) + Services (Input Services)
+ Capital Goods used for business

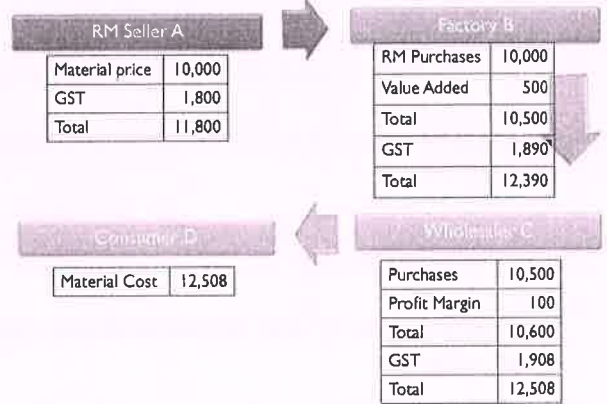

Exempted Goods or Exempted Services

- Certain Goods or Services are exempted from levy of GST, these are called as Exempted Supplies and do not attract GST.

For instance,

- ✓ certain food grains,
- ✓ Education,
- ✓ Rent for residential premises etc.

How GST system works ?

Accounting entries for GST : Output tax

- For intra-state outward supply :

Customer A/c	Dr	11,800	
To Sales			10,000
To Output CGST			900
To Output SGST			900

- For inter-state outward supply :

Customer A/c	Dr	11,800	
To Sales			10,000
To Output IGST			1,800

Concept of Reverse Charge Mechanism (RCM)

- Ordinarily GST is to be collected and paid by Seller (Supplier) of goods or services.
- On certain specified goods and services, GST is to be paid by Buyer / Purchaser (Receiver) instead of the Supplier of goods or services .
- This system of payment of tax by Receiver (Recipient) in case of certain specified goods and services is called **Tax on Reverse Charge**.

Utilisation of Input Tax Credit (ITC)

IGST Payable

- ITC from IGST, CGST and SGST paid on inward supplies of goods/services

CGST Payable

- ITC only from IGST and CGST paid on inward supplies of goods/services.
- SGST input tax credit not allowed against CGST payable.

SGST Payable

- ITC only from IGST and SGST paid on inward supplies of goods/services
- CGST input tax credit not allowed against SGST payable

Sequence of Utilisation of ITC
