## **SEMINAR THEME**

# **‘INDIAN KNOWLEDGE SYSTEM AND NEW EDUCATION POLICY’**

The Indian knowledge system is a rich and intricate tapestry that weaves together ancient wisdom, diverse traditions, and contemporary insights. This abstract provides a glimpse into the multifaceted dimensions of India's knowledge system, exploring its historical roots, philosophical foundations, and its evolving role in the modern era.

The historical perspective begins with the Vedas, Upanishads, and other ancient texts that form the bedrock of Indian knowledge. These scriptures delve into profound philosophical concepts, encompassing spirituality, metaphysics, and ethics. Over millennia, various schools of thought such as Nyaya, Vaisheshika, Samkhya, Yoga, Mimamsa, and Vedanta have contributed to the nuanced understanding of reality, consciousness, and the self.

The Indian knowledge system extends beyond philosophy to encompass sciences, arts, and literature. Mathematics, astronomy, medicine, and architecture flourished during different periods, with contributions like the concept of zero, Ayurveda, and the ancient treatise on architecture, the Arthashastra. The epics, Ramayana and Mahabharata, along with classical texts like Kalidasa's works, showcase the literary prowess and cultural depth of India's knowledge heritage.

However, challenges such as preserving indigenous knowledge, addressing socio-economic disparities, and integrating traditional wisdom with modern development strategies persist. This abstract highlights the need for a holistic approach that values both the ancient and the contemporary facets of India's knowledge system, fostering a harmonious coexistence that propels the nation forward in the global arena. With this backdrop, we at Ness Wadia College of Commerce, are committed to encourage continuous learning and fostering intellectual thought and dialogue. The Late Prin. Dr. B. S.
